

case:-

```
if (cost[i] > coins) {  
    break;  
}
```

```
    coin -= cost[i];
```

```
    count++;
```

```
}
```

```
}
```

```
return count;
```

```
}
```

* Why greedy

↳

Always choose the cheapest available ice cream for maximum.

* Time Complexity.

= $O(n \log n)$.

* Space = $O(1)$.
