

15 Q1

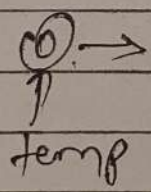

carry

sum/10

Node = sum % 10

- Phele ek dummy node create karo aur usme 0 store karo. Phir dummy ko temp me store kar do.

~~Phele~~ Pehle carry ko 0 rakho.

loop me karo.

while (l1 != null || l2 != null || carry != 0) {
 int sum = carry;
 // math initially sum me zero store hai.

```

    if (l1 != null) {
        sum += l1.val;
        l1 = l1.next;
    }
    if (l2 != null) {
        sum += l2.val;
        l2 = l2.next;
    }

```

Sum me l1 & l2 ke value of sum bare ke sum me store karo.

• $carry = sum / 10$; // ~~etc~~ carry check
~~karoo. karoo~~

let $sum = 12$.

$check = sum / 10$

$= 12 / 10$

$= 1 \rightarrow$ ~~etc~~ carry.

8

$temp.next = new ListNode(sum \% 10);$

Isme sum of ko store karoga but
 wo ek hi digit ko store karoo ~~hata~~
 baki carry me add kar dega.

i.e. $sum = 12$.

$= sum \% 10$

$= 12 \% 10$

$= 2 \rightarrow$ store karoga.

$\rightarrow$ store karoga.

~~etc~~ $temp.next$ me
 $0 \rightarrow$ carry, $1 \rightarrow$ carry

node

0/10

i.e. $l_1 = 7 \rightarrow 4 \rightarrow 3$

$l_2 = 5 \rightarrow 6 \rightarrow 4$

$7 \% 10 = 7$

$7 / 10 = 0 \rightarrow$ carry.

Sum = $7 \rightarrow 6 \rightarrow 8 \rightarrow null$
~~dummy~~ $\uparrow$ $\uparrow$ $\uparrow$
~~temp~~ ~~temp~~ ~~temp~~

$10 \% 10 = 0 \rightarrow$ node

$10 / 10 = 1 \rightarrow$ carry

node

$7 \% 10 = 7$

$7 / 10 = 0 \rightarrow$ carry.

loop ~~stop~~ stop.

At the end.

return dummy.next;
